

★ ★ ★ ★ ★
★ Software Engineer with enthusiast in
★ backend development and cloud-
★ based systems using Java, Spring
★ Boot, and AWS. Built RESTful APIs
★ and database-driven applications,
★ with experience in CI/CD and
★ containerization. Passionate about
★ designing scalable systems and
★ improving application performance.

SKILLS

- Web Application Development
- Data Science
- IOS Application Development
- Android Application Development
- Cloud development
- Game Design And Development
- Software architecture

LANGUAGES

- English | Advanced
- Japanese | Elementary
- Korean | Elementary

GRADUATE STUDENT

THANT ZIN MIN

EXPERIENCE

- Mar 2026
SOFTWARE ENGINEER INTERN
Trusted Brothers Company Limited. **Bangkok, Khlong San**

Developed full-stack web applications using JavaScript (frontend and backend) to support internal business operations.

Collaborated with team members to build and enhance features supporting business workflows, improving usability and system efficiency.

<https://www.trustedbrothers.co/>
- Jun 2025
SOFTWARE ENGINEER
D*Code Research Laboratory. **Assumption University**

Collaborated with a university and industry partner to develop real-world applications.

Leading development of AU Connect, a senior project focused on delivering a scalable and user-centered platform.
- Jun 2023
Present
STUDENT
Assumption University.
 - Persuading Bachelor of Science In Computer Science at Assumption University.
 - GPA - 3.52

EDUCATION

- Jun 2023
Present
BACHELOR OF SCIENCE : COMPUTER SCIENCE
Assumption University. Samut Prakan, Bangkok

PROJECTS

- **AU Connect** - A scalable university platform for student interaction and services.
 - - Tech: (Next.js, React, Prisma ORM, MongoDB, Docker, Azure)
 - - Designed and developed backend APIs for user management and data handling
 - - Implemented scalable architecture for handling concurrent users
 - - Led development as part of senior project collaboration with university and industry<https://github.com/Tommyzizii/au-connect.git>
- **Burn & Learn** - iOS fitness tracking application.
 - - Tech: Swift, UIKit, HealthKit
 - - Developed features for calorie tracking and health data integration
 - - Implemented user-friendly UI and real-time health data synchronization<https://github.com/Tommyzizii/iOS-Swift-UIKit-Project.git>
- Penny Track Personal expense tracking application.
 - - Tech: (Android Jetpack Compose / Room / Firebase)
 - - Built features for expense categorization and daily/monthly tracking
 - - Implemented data persistence and financial visualizationhttps://github.com/Tommyzizii/Android_Term_Project.git
- Ad Click Prediction Model
 - - Tech: Python, Pandas, Scikit-learn
 - - Built linear regression model to predict ad performance
 - - Performed data preprocessing, visualization, and model evaluation (MSE, RSE)<https://github.com/Tommyzizii/ad-click-regression-model.git>
- Credit Card Approval Prediction
 - - Tech: Python, Scikit-learn
 - - Implemented Logistic Regression and KNN models
 - - Performed feature scaling, encoding, and model evaluation<https://github.com/Tommyzizii/credit-card-approval-ml-classifier.git>

CERTIFICATIONS & COURSES

AWS Cloud Formation
AWS Cloud Development
AWS Cloud Operation
